

INSTALLATION WORKSHOP

This introductory workshop will provide a combination of class room information and hands-on instruction of the basic, yet critical, installation techniques.

Sign in if you are a designer, painter, decorator, contractor, dealer or simply someone who wants to have the job installed correctly and profitably the first time.

The workshop is intended to accomplish the following:

- Introduce you to our products (approx. 0.5h)
- Show you how to work with our products (approx. 6h), which includes:
 - planning and preparing your work
 - useful installation techniques
 - time saving tips and tricks
 - using handy tools
 - working with complex internal and external corners of different angles
 - dealing with joints
 - proper cleaning and surface preparation to insure a good application
 - avoiding installation related failures

Attendees will receive:

- a certificate
- a van sticker
- a mitre box
- a show case with samples
- luxury picture book
- a set of catalogues and brochures
